

The law does allow the RTC to borrow from the Treasury up to \$ 5 billion at any time .

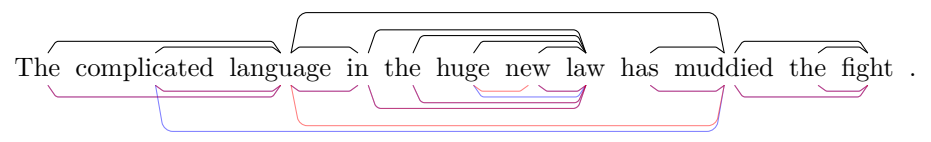

The diagram illustrates the hierarchical structure of the sentence using brackets. Black brackets are positioned above the text, and red brackets are positioned below it. The black brackets group the text into a nested hierarchy: 'The' and 'law' are grouped together; 'does' and 'allow' are grouped together; 'the' and 'RTC' are grouped together; 'to' and 'borrow' are grouped together; 'from' and 'the' are grouped together; 'Treasury' and 'up to' are grouped together; '\$ 5 billion' and 'at' are grouped together; and 'any time .' are grouped together. The red brackets group the text into a nested hierarchy: 'The' and 'law' are grouped together; 'does' and 'allow' are grouped together; 'the' and 'RTC' are grouped together; 'to' and 'borrow' are grouped together; 'from' and 'the' are grouped together; 'Treasury' and 'up to' are grouped together; '\$ 5 billion' and 'at' are grouped together; and 'any time .' are grouped together. The red brackets are nested within the black brackets, indicating a more granular level of grouping.

The complicated language in the huge new law has muddied the fight .

The image displays a sentence with two levels of bracketing. The top level uses black brackets to group the sentence into three main parts: 'The complicated language', 'in the huge new law', and 'has muddied the fight .'. The bottom level uses blue brackets to group the sentence into four parts: 'The complicated language', 'in the huge new law', 'has muddied', and 'the fight .'. The blue brackets are nested under the black ones, indicating a more granular syntactic analysis.

The law does allow the RTC to borrow from the Treasury up to \$ 5 billion at any time .

The diagram illustrates the hierarchical structure of the sentence using brackets. Black brackets are positioned above the text, and blue brackets are positioned below it. The blue brackets are nested within the black brackets, indicating a more granular level of grouping. The black brackets group the sentence into three main parts: 'The law does allow the RTC to borrow from the Treasury', 'up to \$ 5 billion', and 'at any time .'. The blue brackets group the sentence into four main parts: 'The law does allow the RTC to borrow from the Treasury', 'up to \$ 5 billion', 'at any time', and a final period. The blue brackets are nested within the black brackets, indicating a more granular level of grouping.

The law does allow the RTC to borrow from the Treasury up to \$ 5 billion at any time .

The diagram illustrates the hierarchical structure of the sentence using brackets. Black brackets at the top group the text into four main segments: 'The law', 'does allow the RTC', 'to borrow from the Treasury up to \$ 5 billion', and 'at any time .'. Below these, a series of purple and blue brackets show further sub-groupings. For example, 'does allow the RTC' is further divided into 'does', 'allow', and 'the RTC'. The phrase 'to borrow from the Treasury up to \$ 5 billion' is grouped together by a long blue bracket at the bottom, indicating it is a single complex action or condition.
